

Winterizing Plugs

Instructions and Part Numbers

Paramount's 2 1/2" flanged threaded winterizing plugs and 2" and 3" threaded winterizing plugs can be used on any standard female threaded fitting.

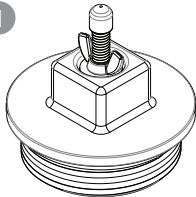

To ensure a tight seal on the 2" and 3" threaded winterizing plugs use Teflon, we recommend 9 wraps of Teflon tape.

2 1/2" flanged winterizing plugs come with an o-ring. We recommend only 2 wraps of Teflon tape.

Both plugs are equipped with a Schrader Valve to allow compressed air to be pumped into the lines for winterizing if desired.

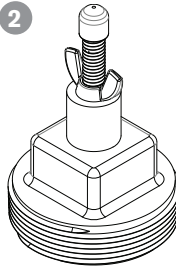

Warning: If these plugs are used on a suction inlet be sure the correct VGB listed cover is re-attached using the manufacturer's required hardware.
