

# TAKE YOUR POOL AND SPA SAFETY TO THE NEXT LEVEL

- NO MECHANICAL DEVICES TO FAIL
- NO ELECTRICAL CONNECTIONS TO SHORT OUT
- LOCATED CLOSE TO DRAIN FOR MORE SENSITIVITY AND QUICKER RESPONSE
- LOWEST COST AND MOST EFFECTIVE SVRS OPTION

SAFETY IS ALWAYS  
TOP PRIORITY

## Features & Benefits

### Your peace of mind. Automatically.

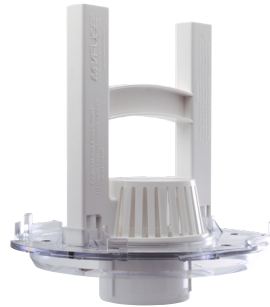

Paramount's MVFuse, the only listed Magnetic Safety Vacuum Relief System (SVRS), takes pool & spa safety to the next level with an additional LAYER of anti-entrapment protection. This patented MVFuse technology eliminates the danger of body entrapment with its automatic suction release, giving pool & spa owners the peace of mind that their loved ones are safe.

Designed to operate pool & spa-side, which is closer to the point of suction than other SVRS, the MVFuse is more sensitive and responds quicker, cutting down on precious seconds lost by other systems waiting to engage. The MVFuse has no electrical connections to short out and no mechanical devices to fail, which means it will work every time.

### Deck-side MVFuse

Paramount's Deck-Side MVFuse is designed to address any pool & spa suction need whenever the use of an SVRS is required or desired for an additional layer of safety.

### In-canister MVFuse

Paramount's MVFuse is available as an option in new debris canisters and can be retrofit to existing canisters allowing for a simple and affordable safety upgrade.

**Warning:** MVFuse must be installed in accordance with Paramount's written instruction manual, and in conformity with all applicable Federal, State, Local and Swimming pool industry building and safety codes.
