

OPTICIRC IN-FLOOR CIRCULATION

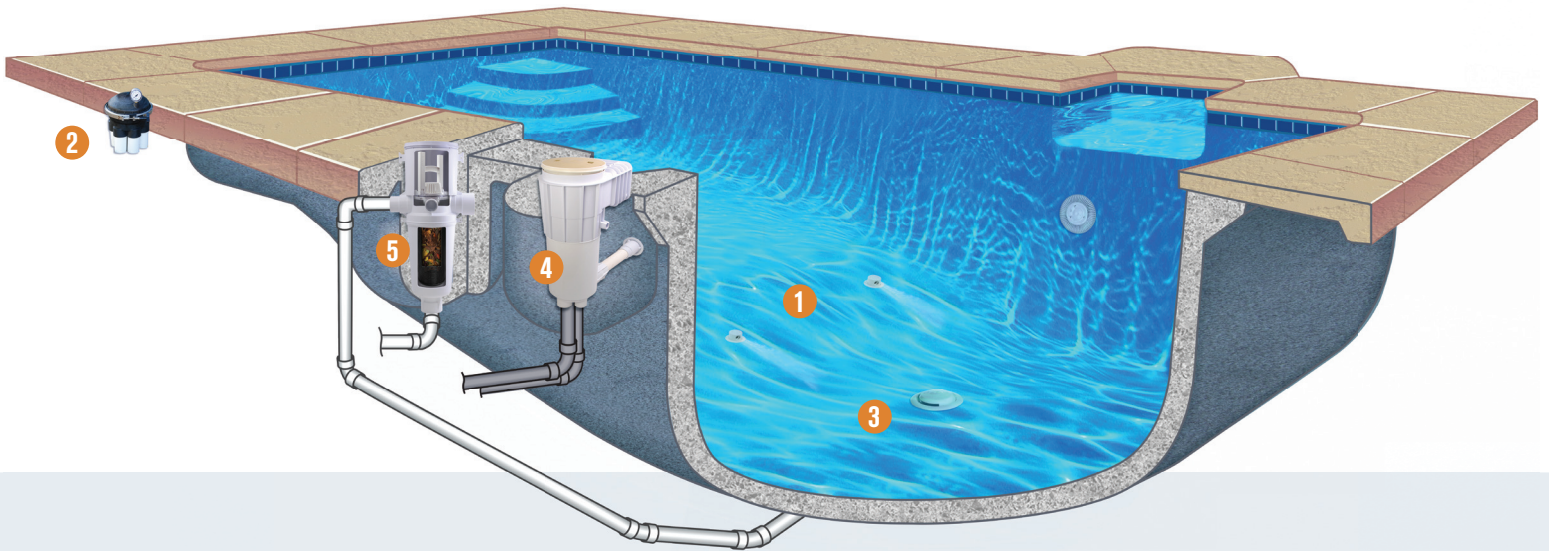

OPTIMAL CIRCULATION MEANS OPTIMAL ENJOYMENT.

- A MORE EFFICIENT, HEALTHIER AND EASIER TO MAINTAIN POOL
- EFFECTIVELY CIRCULATE CHEMICALS AND WARM WATER TO THE ENTIRE POOL

OptiCirc[™]
In-Floor Optimal Circulation

Improved energy efficiency, circulation and debris removal capability.

Exceptional products
working together
for the most effective &
efficient surface to floor
circulation available.

- 1 **Patented rotating nozzles** provide enhanced cleaning and circulation throughout the pool floor and disappear when not in use.
- 2 Powering the in-floor nozzles jets is the hydraulically driven **Water valve**. The brain of the system; 100% pressure safe and requires no routine maintenance.

OPTIONAL EQUIPMENT FOR ADDED CONVENIENCES:

- 3 **MDX-R3 debris drain** safely and effectively collects dirt, leaves and other debris from your pool and delivers to the large capacity debris containment canister.
- 4 **ParaskimV venturi skimmer** is the latest in high-tech and energy saving designs. Twice the cleaning power over standard skimmers and the most efficient skimmer available for multi-speed and variable speed pumps.
- 5 **DDC2 & EDC large capacity debris canisters** are conveniently located either deck side or by the pool equipment to collect debris in its large capacity basket for easy removal. It pre-filters large debris which keeps the circulation pump free and clear of debris that could restrict water flow.
