## THE EVOLUTION OF DEBRIS REMOVAL

### THE MOST EFFECTIVE INVISIBLE, UNBLOCKABLE DRAIN

Paramount® continues to lead in drain technology with the RDX™ Unblockable Drain. This cutting-edge advancement in drain safety is VGB compliant, invisible and unblockable. The RDX combines safety and high flow in a single outlet, ensuring the swift and effective removal of debris. Compatible with concrete finishes, it is easy to install with less plumbing than conventional drains and blends seamlessly into the pool floor.

- RDX features true debris mitigation with an unblockable, VGB compliant design to protect against hair, limb, body, and mechanical entrapment. The large capacity sump eliminates plugged drains and collects large debris.
- IAPMO certified to meet the ANSI/APSP-16 2017 anti-entrapment requirements.
- Listed for single drain use.
- RDX lower sump includes 2" port for hydrostatic valve.
- Outstanding for pools as well as spas, overflow basins, and fountains, anywhere debris needs to be removed.

#### OPTIONAL ENHANCEMENTS: **Large Capacity Debris Canisters**

Paramount's Equipment Side or Deck Side debris canisters are the largest in the industry, helping ensure optimal pump efficiency by keeping debris out of the pump baskets.

## DISCOVER THE SUPERIOR DESIGN OF RDX

#### **FULL FILL CENTER**

Reduces the risk of cracking, enabling a solid fill throughout.

#### **ADJUSTABLE PLUMBING**

Includes 4" rotatable elbows for easy alignment.

**WARNING:** RDX 200 and RDX 300 must be installed in accordance with Paramount's written instruction manual, and in conformity with applicable Federal, State, Local and Swimming pool industry building and safety codes.

## TWO SOLUTIONS FOR A CLEAN, SWIM-READY POOL

RDX offers versatile solutions for all floor drain applications, delivering superior flow rates to meet any need.

- **RDX 200:** For flow rates up to 200 GPM.
- **RDX 300:** For flow rates up to 300 GPM and supports up to 2 pumps.
