

PRESENTING THE SELF-CLEANING
POOL UNLIKE ANY OTHER.

EVER.

NO HOSES. NO HASSLES. NO MESS.

PURPOSEFUL, POWERFUL CLEANING CYCLE

Thanks to the patented PCC2000, the automatic in-floor pool cleaning and circulation system, your pool can be built to clean itself while you relax. Built directly into the pool floor, PCC2000 is engineered to clean your entire pool, including walls, floors, steps, benches, and even spas. When not operating, nozzles retract flush with the pool floor, becoming virtually invisible. There are no vacuum hoses left floating in the pool, or mechanical devices to be removed. All that's left is a sparkling clean pool that's ready to enjoy.

GUARANTEED CLEAN & CAREFREE

Custom designed for every unique pool shape, PCC2000 is so effective it will clean 99% of your entire pool, guaranteed*. Not only are Paramounts in-floor cleaners considered the most technologically advanced pool cleaners available, they are also built to last for the life of your pool. That's why PCC2000 comes with a lifetime limited warranty on all cleaning jets. Relaxation, indeed.

- PATENTED IN-FLOOR CLEANING UNLIKE ANY OTHER
- NO ROUTINE MAINTENANCE
- NO UNSIGHTLY CLEANER TO REMOVE FROM THE POOL
- 99% POOL CLEANING GUARANTEED INCLUDING STEPS, BENCHES, SPAS AND WATER FEATURES
- ENHANCED CIRCULATION AT LOWER ENERGY SAVING PUMP SPEEDS
- LIMITED LIFETIME WARRANTY ON CLEANING NOZZLES

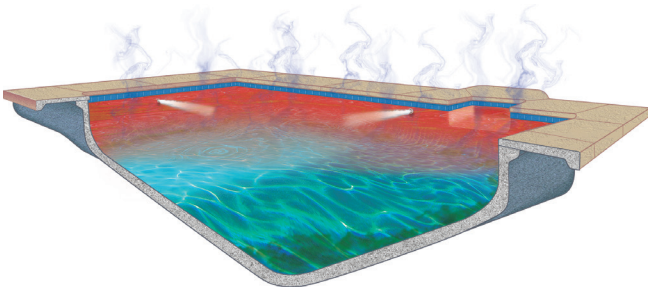

CLEAN & VIRTUALLY UNSEEN

99% Clean Guarantee: Pool design, elements or features that prohibit placement of system components will not be considered part of the 99% cleaning guarantee. See cleaning certificate for complete details. Limited Lifetime Warranty applies to the original pool owner. Please see our All Inclusive Warranty for details.

ENHANCED CIRCULATION IS EFFORTLESS.

Standard pools are poorly circulated, resulting in chemical and heat energy loss, as well as algae-prone areas

CIRCULATION MEANS CLEANER & HEALTHIER WATER

In a standard pool, water is circulated near the pool surface where chemicals and heat are quickly lost into the atmosphere. This leads to wasted chemicals and heat energy, and a poorly circulated pool can often create algae-prone areas. PCC2000 utilizes strategically placed cleaning nozzles in the pool floor, steps and benches, to evenly circulate water from the bottom up. This improved circulation creates cleaner, healthier, more comfortable pool water, while reducing the loss of chemicals and heat energy into the atmosphere.

EFFICIENT & ECONOMICAL

The key to PCC2000's unsurpassed performance is its water-powered hydraulic valve. A hydraulic water valve is more efficient and reliable than traditional mechanical valves, which means it uses less energy and operates with more power, each and every cleaning cycle. When used with today's variable speed pumps, PCC2000 ensures full circulation without any stagnant areas - at even the lowest pump speeds.

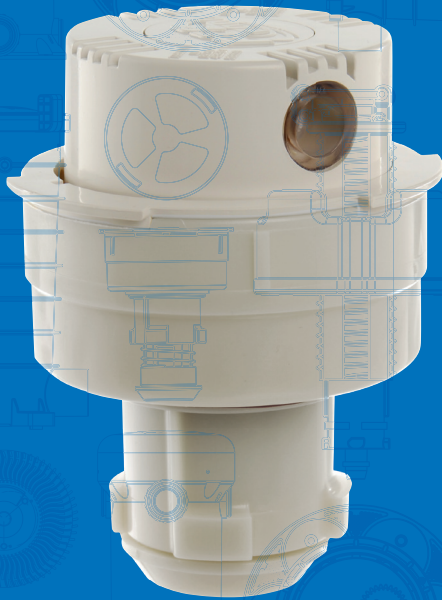

CIRCULATION ADVANTAGES OF A PCC2000 POOL

- Complete circulation of water and chemicals
- No poorly circulated or algae-prone areas
- Eliminates cold spots for more comfortable swimming
- Extends the swim season
- Saves on chemical and heating costs for the life of the pool
- Fewer chemicals mean a healthier environment

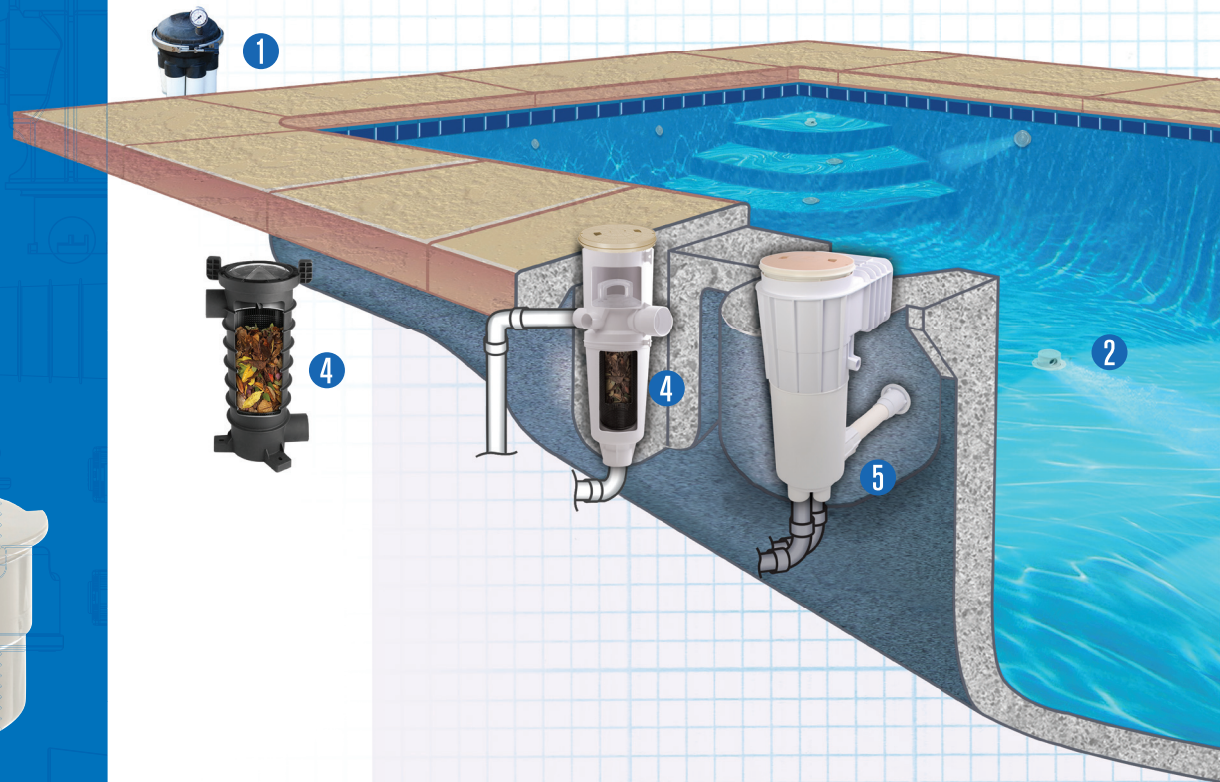

THE TECHNOLOGY BEHIND RELAXATION

- CLEANING NOZZLES PLACED IN FLOOR, WALLS, STEPS, BENCHES AND SPAS, WORK TOGETHER TO SWEEP DEBRIS TOWARD THE PATENTED COLLECTION ZONE
- RETRACTS FLUSH WITH POOL FLOOR AND BECOME VIRTUALLY INVISIBLE WHEN NOT IN USE
- NOZZLES COME WITH OUR LIMITED LIFETIME WARRANTY
- AVAILABLE IN 6 COLORS THAT COMPLEMENT ANY POOL FINISH

THE PATENTED DEBRIS COLLECTION ZONE

- ONLY SYSTEM WITH PATENTED DEBRIS MANAGEMENT
- DOESN'T RELY ON RANDOM AGITATION
- CLEANS FASTER THAN EVERY OTHER IN-FLOOR SYSTEM
- LIMITED LIFETIME WARRANTY ON CLEANING NOZZLES

A SYSTEM OF EXCEPTIONAL PRODUCTS

1

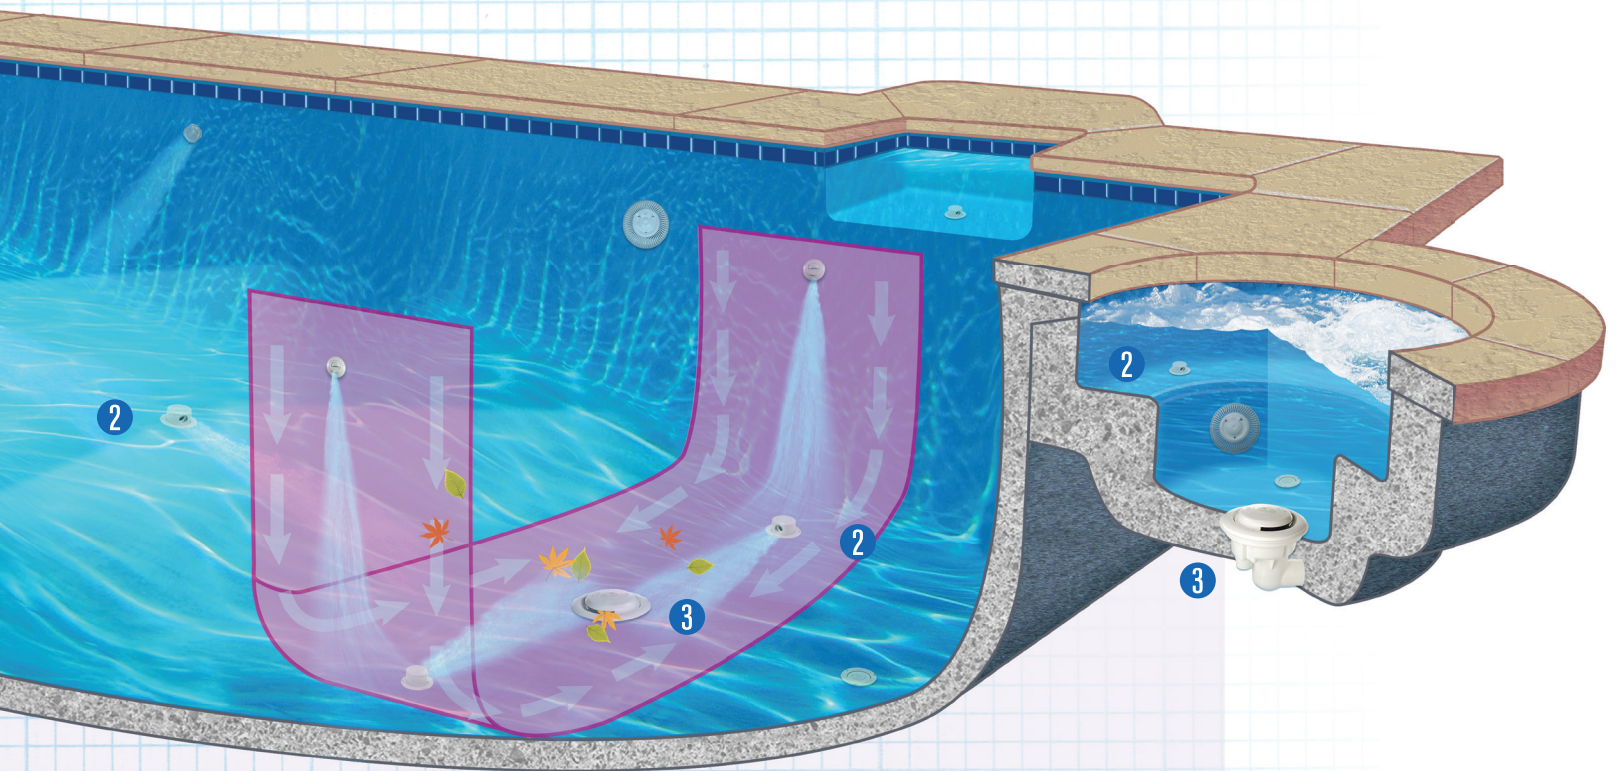

AUTOMATIC WATER VALVE CONTROL SYSTEM

The PCC2000 Water Valve functions as the hydraulic brain of the system, directing a powerful flow of water to each set of cleaning nozzles.

2

POP-UP CLEANING NOZZLES SWEEP POOL DEBRIS

Strategically placed fixed nozzles and downjets systematically sweep debris towards the patented Debris Collection Zone and MDX-R3 main drain

All in-floor pool cleaning systems are, by design, based on "agitation" that randomly move debris around the pool. *Except this one.*

PCC2000 utilizes powerful floor nozzle technology and a proprietary system design to systemically sweep debris towards the patented Debris Collection Zone. This Zone, stretching across the deepest part of your pool, exerts a constant subtle flow in the direction of the debris removal drain. Debris entrapped within the Collection Zone is then efficiently delivered to the active MDX-R3 drain for removal from the pool. PCC2000 leaves nothing to chance. It's patented, advanced cleaning and it's the only system of its kind.

3 MDX-R3 DEBRIS REMOVAL SAFETY DRAIN

The MDX-R3 safely & efficiently removes small and large debris from the pool - including large leaves, pine needles, acorns and seed pods up to 1" in diameter.

4 LARGE CAPACITY DEBRIS CANISTERS

Paramount's Equipment Side or Deck Side debris canisters are the largest in the industry, helping ensure optimal pump efficiency by keeping debris out of the pump baskets.

5 VENTURI SKIMMING EQUALS SMARTER SKIMMING

Unlike traditional suction-only skimmers, the ParaskimV Venturi Skimmer uses suction and pressure to deliver enhanced surface skimming for unmatched surface debris removal - even at low pump speeds.
